

Hey Mindy ,

Can you identify with the above picture? Having WAY too much to do, but not enough time or resources to finish all the projects associated with running a business? We get it!

At Media Services Unlimited, our main focus is to assist small business owners with marketing projects that are vital to the growth of the business. Our expertise include:

Web Design/Maintenance –Designing or updating text, graphics or videos - we can do it all. SEO research and implementation are other areas that we specialize in.

Social Media Management – We can assist with a variety of projects including social media material creation, scheduling of posts, social media engagement and digital advertisement creation and reporting.

Creative Writing - If you need creativity, we've got you covered - blog articles, newsletters, sales letters, email marketing and so much more.

Video Marketing – From product demonstrations to how-to tutorials, we can assist in developing a video that will make the audience click the play button over and over again!

You can choose to receive either a free 30-day content calendar filled with social media post ideas OR a comprehensive marketing audit (think of it as a report card on your online presence) by completing this **form**.

Don't worry—if you're not interested in staying in touch, this will be the only email you receive from us.

Hope to connect with you soon!

Mindy Thomas
